Sireaeva Daria

WELCOMING PAGE

After opening my personal webpage, the first thing you'll see is the welcome page is a large,underlined heading which represents me(<h1>). Below the name, there is a navigation(<nav>) menu with four navigation links(<a>): 'about me', 'my CV', 'gallery', and 'contacts',which are put as items in a list() and which is located in (div class="container1").After clicking on the preferable link,it changes the color(using a:hover) You can click on these links to go to the different pages of the website.This part helps users move easily between the different sections of my website.Under the navigation, there is main content area(<main>) a profile image from my images folder().

Hi, I'm Dasha! I'm 19 years old and originally from Moldova.
I'm a curious, creative, and positive person who loves learning new things and expressing myself through what I do. I enjoy spending time on relaxing, stress-free hobbies, exploring new ideas, and taking care of myself inside and out. I'm passionate about personal growth, beauty, and living life with balance and intention.

WELCOME PAGE ABOUT ME MY CV GALLERY CONTACTS

Below the image, there is a paragraph(<p>), which is moved to a new line using the (
) tag. At the bottom of the page is a footer(<footer>) which is separated into a small heading(<h2>), small image(), contact information(tag which makes this text bold) and another set of navigation links that are the same as the ones at the top(<nav>).

ABOUT ME PAGE

The screenshot shows a website layout for an 'About Me' page. At the top, there's a navigation bar with links: WELCOME PAGE, ABOUT ME, MY CV, GALLERY, and CONTACTS. Below the navigation is a grid of images related to baking. The first row has three images: a white cake with pink roses, a pink cake with a teddy bear, and a white cake with purple flowers. The second row has two images: a heart-shaped cake and a white cake with green leaves. The third row has two images: a white cake with pink flowers and a white cake with purple flowers. In the center of the grid, there's a large text area with the word 'BAKERY' in a large, bold, serif font. To the right of this text is a small image of a pink teddy bear on a cake. Below the text, there are two columns of text. The left column reads: 'Cooking is my passion especially baking some kinds of unique desserts. I love the making of something delicious from scratch. I genuinely enjoy the process of cooking a recipe while observing those steps.' The right column reads: 'For me, the most exciting part is watching the whole thing come together as transformed from raw ingredients into something finished and beautiful like dessert. The moment of seeing the result at the very end is so rewarding.' At the bottom of the page, there's a contact section with a photo of a woman, her name 'dasha siraeva', and her phone number '+4368120188286' and email 'siraevadara75@gmail.com'. Below this contact section is another navigation bar with links: WELCOME PAGE, ABOUT ME, MY CV, GALLERY, and CONTACTS.

I used a <table> element with (`table border="5"`) to organize my main content. Inside the table, I used several rows(`<tr>`) and columns(`<td>`) to position both images and text in a structured way. In the first row, the first cell (`<td>`) spans four rows using (`rowspan="4"`) and contains an image1 of baked goods(``) and giving different classes for each image to position them correctly(`"`). Next to it, there's a large cell that spans two columns with the word BAKERY, centered and styled with a big font size. On the right side of that row, there's another inserted image2. The last cell in that row spans four rows too and contains another image3. In the second and third rows i added more text and images. There's an image4 in one cell and beside it, i wrote text inside `<td>` elements describing my passion for baking.

MY CV PAGE

The screenshot shows a website template for a CV. At the top, there is a navigation bar with links: WELCOME PAGE, ABOUT ME, MY CV (which is the active page), GALLERY, and CONTACTS. The main content area has a light beige background. It features a large title "My CV" at the top left, followed by a circular profile picture of a woman with blonde hair. Below the photo, there is a summary of personal information: Date of birth: 03/06/2006, Address: arbeitergasse5, Email: siraevadara75@gmail.com, and Phone number: +4368120188286. Further down, there are two sections: "ABOUT ME:" which contains a paragraph about the user's personality and goals, and "EDUCATION AND TRAINING:" which includes a section for "PRIMARY AND SECONDARY EDUCATION".

So basically, my page is structured into three big parts: the navigation at the top, the main CV content in the middle, and the footer at the bottom. I have `<div>` called *block1*. Inside it, I put `<h1>`, which is my main title — “My CV.” Then there’s an `` tag that shows my photo, and below that, I have another div for my personal info. In that section, I used `<p>` tags for things like my date of birth, address, email, and phone number, and I made the labels bold using ``. After that comes *block2*, which is the main content of my CV. Inside, I use a `` again to list all my main sections — About Me, Education, Work Experience, Language Skills, and Volunteering. In the About Me part, I used `<h3>` for the subtitle and wrote a paragraph about myself. Then I used `<hr>` to draw a line separating it from the next section. In the Education section, I used `<h3>` again for the title, and inside, I underlined the

names of my schools using <u> and listed my studies. I bolded the title with ****.

administrative office assistant: I managed course schedules, student registrations and provided support to students while assisting with various administrative tasks. Contributed to a positive and organized work environment through professional communication and teamwork.

• LANGUAGE SKILLS

language	level
Russian	native
Romanian	half native
English	C1
German	A2

• VOLUNTEERING

camp counselor: While being responsible, creative, innovative and reliable I had been overseeing children and educating them through games. I created and led games and activities that helped the kids learn English in a fun way, helped the kids work together, make friends, and enjoy the camp as a group. helped kids with their English, giving them support when they needed and promoted camp values.

volunteer tutor: I've been a volunteer educator for primary school students facing some challenges at school. I helped them because they had a hard time learning by giving one-on-one learning experiences and small group classes. Creating a good environment for learning should help them become much more confident about asking questions. To do this, I worked closely with teachers to identify areas where students needed help. Based on those areas I came up with ways to support and provide them help.

• ABOUT ME:

I'm a curious and motivated student, who is open-minded towards learning new things. I enjoy working with people, and I also carry a positive attitude. I'm easygoing and enjoy working with others while keeping a positive attitude. I try to keep growing in life while managing an equal balance of having fun as well. Besides school, I involve myself in a lot of activities, learning and connecting with new people. What is actually important is maintaining a normal approach, being focused on your goal but realizing when to take a break and relax. I'm trying to reach and gain my entire potential.

• EDUCATION AND TRAINING:

PRIMARY AND SECONDARY EDUCATION
Cantemir Theoretical Lyceum

DIPLOMA DE BACALAUREAT
Alexander Pushkin Theoretical Lyceum

Volunteering section, I again used **<h3>** for the title. I made the roles bold and colorful using inline styles. At the end, I have the **<footer>** section, which is the bottom part of my page.

Below the heading, I have a series of (`<div class="photos">`) containers. Each container holds either a (`<video>`) element with a(`<source>`) or an (``) element displaying an image. Below each media item is a (`<p>`) tag for a caption, showing the location with a little geolocation emoji. At the bottom, I have a `<footer>` section.

Next comes the(`<form>`) element. This is a contact form inspired by an online tutorial.

Inside the form:

- `<h4>` is a heading that labels the form as “Contact form.”
- `<input>` fields collect user data: first name, last name, and email. They all use `required` to make sure the user can’t submit an empty field.

- <textarea> allows users to type a longer message.
- <button type="submit"> is used to send the form when clicked.
